

Journal of Geosciences

An open-access journal, published by the Czech Geological Society (<http://www.jgeosci.org>), indexed e.g., by: *Citation Index Expanded* (IF = 1.326), *Current Contents (Physical, Chemical & Earth Sciences)*, *Scopus*, *ProQuest*, *GeoRef*, *Geobase*, *Chemical Abstracts*, *EBSCO*.

CALL FOR PAPERS TOURMALINE. A SPECIAL ISSUE ARISING FROM THE INTERNATIONAL SYMPOSIUM TOURMALINE 2017

Guest editors: J. Cempírek and M., Novák

(Department of Geological Sciences, Masaryk University, Brno)

Almost twenty years ago, the symposium **Tourmaline 1997** in the Czech Republic brought together a large group of scientists studying role of tourmaline in geological environment. **Twenty years later**, scientists interested in tourmaline will share their findings and broaden their knowledge on boron cycle in various geological systems.

We are pleased to announce that a forthcoming special issue of *Journal of Geosciences* will be devoted the symposium **Tourmaline 2017**. It will cover all aspects of tourmaline and associated borosilicate minerals: crystallography, mineralogy, petrology, spectroscopy, geochemistry, economic geology, applications. We would like to invite submissions of your extended talks from the symposium.

Instructions to Authors and Microsoft Word manuscript template are available to be downloaded at the journal website, <http://www.jgeosci.org>, in order to facilitate the submission procedure. If you intend to submit a manuscript to the special issue, please, indicate your interest and send provisional title(s) of your paper(s) to one of the guest editors by the **August 31, 2017**. Manuscripts will be accepted for review until **end of September 2017** and will be published online on **April 15, 2018** and printed soon thereafter. All manuscripts will be reviewed as standard procedure by at least two international specialists in the field. We are looking forward to your contributions to this issue.
